ADVANCING DENTAL TECHNOLOGY
Express Portable Dental System

The most popular self-contained pneumatic dental system in the world. Critical equipment for providing operative or preventative dentistry in the field. Runs standard air handpieces (highspeed and/or slowspeed), includes high volume and low volume vacuums and air/water syringe. One gallon waste container can last all day. Dual-voltage, just plug it in - anywhere in the world!

Express Air
Handpiece operates independently from suction using rheostat
Express Air (One hp connection) .......... ADU-17A
Express Air II (Two hp connections) ....... ADU-17A2

Express
Handpiece operates independently from suction using manual switch on console
