Premium Portable Dental System

High Torque Electric Motor

Fiber Optics Available

ADVANCING DENTAL TECHNOLOGY
The Transport II is a fully self-contained electric dental system that uses E-type handpieces for more torque. This makes cutting teeth easier in a mobile environment. It is easy to set up and operate, and all components pack into the impact-resistant carrying case with wheels.

“Aseptico makes the smallest, lightest weight, most efficient equipment I have ever utilized. We traveled to the Mississippi Gulf Coast following Hurricane Katrina. We treated children from New Orleans & the Mississippi Gulf Coast using Aseptico equipment. It functioned without problems in an extreme environment.

On the rare occasion the equipment has needed repairs, the Staff at Aseptico have been quick, efficient & reliable at repairing & returning the equipment promptly.”

Dr. Richard L. Smith

Details
• Powerful, brushless, 30k rpm, autoclavable micromotor
• Console displays the following E-type handpiece ratios: 1:5, 1:1, 4:1, and 16:1
• Fiber optic micromotor features internal irrigation
• 3-way air/water syringe
• 1 Liter water reservoir
• Automatic activation of high volume and saliva ejector suction
• Ample waste containers with automatic shut-off and fill indicator
• Built-in compressor
• Includes AE-7P On/Off Footswitch
• Air pressure gauge
• Dual voltage (auto sensing)
• Power cords for 110 V and 220 V included
• Manufactured in the USA
• Power Rating: 800W
• Dimensions: 10.5” x 15.4” x 24” (26.7 x 36.8 x 61 cm)
• Weight: 53.5 lbs (24.3 kg)
